

ICCR Process Heater Work Group Teleconference  
August 21, 1998  
11 a.m. - 1 p.m. Eastern time

DISCUSSION AND DECISIONS

Teleconference participants discussed the draft MACT documentation paper for indirect-fired process heaters. Sections VIII, IX, and X remain to be completed. A full analysis of these fuel categories (crude oil, wood, and coke oven gas) will likely remain incomplete for the September Coordinating Committee meeting. A second draft of the document will be distributed on August 28 or 29 for additional review prior to the document being forwarded to EPA for posting to the TTN. Any substantive comments should be limited to the first draft, as time to address such comments on the second draft will be limited.

Teleconference participants also discussed the status report for other-fired process heaters that will be presented at the upcoming Coordinating Committee meeting. There were no substantive questions or comments concerning the paper.

The September Coordinating Committee meeting was briefly discussed. Bill Maxwell stated that the Work Groups will present closure items on the first day of the meeting and that works in progress and informational items are to be presented on the second day. At the time of the teleconference, EPA had not distributed information on the format that Work Group presentations must take.

ACTION ITEMS

Comments on the first draft of the MACT documentation paper for indirect-fired process heaters must be submitted to Chuck Feerick via e-mail or fax by COB (Central time) August 25.

Bill Maxwell will draft language to be inserted into Section X concerning coke oven gas and will forward it to Chuck Feerick.

John Ogle will draft language to be added to the paragraph on fuel quality in Section V.E concerning the potential impact of the HON requirements and will forward it to Chuck Feerick.

Following distribution of the second draft of the MACT documentation paper, comments must be submitted to Chuck Feerick or Lee Gilmer via e-mail or fax by COB (Central time) September 1.

The Work Group will submit the materials/information that will be discussed at the upcoming Coordinating Committee meeting to Bill Maxwell by September 3 for posting to the

TTN on September 9.

Following an announcement by EPA concerning the format of the presentations for the September Coordinating Committee meeting, Bill Maxwell will distribute an e-mail to the Work Group so that members may begin to prepare for the meeting.

Any additional comments that individuals may have concerning the Pollution Prevention guidance documents provided by the Coordinating Committee to the Work Groups should be forwarded to Bill Maxwell.

ERG will distribute the control details tables for the other-fired and wood subcategories to Work Group members by COB August 24.

#### UPCOMING MEETINGS

A half-day meeting is scheduled for September 15 in Durham, NC beginning at 9 a.m.
